

Reverse Osmosis Drinking Water System

- WATTS KWIK-CHANGE REVERSE OSMOSIS SYSTEM, SIMPLY THE BEST OF THE BEST!
- WATER QUALITY ASSOCIATION GOLD SEAL CERTIFIED TO NSF/ANSI STD. 58.
- UNLIKE CONVENTIONAL R.O. SYSTEMS, WATTS DRINKING WATER SYSTEMS WITH KWIK-CHANGE CARTRIDGES HAVE NO SUMPS, SO THEIR PROPRIETARY FILTER ELEMENTS AND MEMBRANES ARE EASY TO REPLACE.
- SYSTEM AND STORAGE TANK SIZED APPROPRIATELY TO SUPPLY THE HIGHEST QUALITY DRINKING WATER FOR WHERE YOU DESIRE IT.
- 1 YEAR METRO WATER FILTER SATISFACTION GUARANTEE
- INSTALLED BY A MASTER PLUMBER & SERVICED BY A SERVICE DEPARTMENT WITH 25+ YEARS EXPERIENCE

Reverse Osmosis Systems are often requested for the highest quality drinking water to r.o. faucets, refrigerators, and ice makers. Many refrigerators and most ice makers are now calling for street pressure on the incoming water line. At MWF we offer a water boosting pump called a Grundfos Scala2, which is a fully integrated digital water booster that provides the proper pressure at all times. This is what is needed to protect your appliances! On the contrary, a permeate pump is a very small pump that instead forces water through the R O quicker, which helps keep water in the tank. But the pressure needed for appliances oftentimes is not met when going this route, and can drop completely if much water is called for at the same time. We choose to stay with the best, professional route to deliver the best water pressure and believe our customers deserve no less.
