*We choose to stay with professional grade equipment to fulfill our mission to provide the best products and service to our clients. We feel this provides a value that our clients want and deserve. Digital metered system tracks the water being used and then regenerates as needed which keeps salt use efficient. Water softeners work through a process called ion exchange which eliminates calcium and magnesium from the water. We at MWF are always happy to discuss how water softeners work and why this process may be needed for all your home's water. Comes with Clack's 5 year parts & electronics warranty. Also includes a Clack Woven Fiberglass Tank with Clack's 10 year warranty on it.*
